

JUNHE (JONHAWK) YIN

University of Macau, Macau SAR, China

SC30826@um.edu.mo | (+86) 138-4525-4836 | (+853) 6538-7790

Fields: Legislative and Electoral Politics; Political Institutions and Public Administration; Comparative Political Economy; Computational Social Science

Methods: Causal Inference and AI for Research | **Regional Focus:** United States; East Asia

EDUCATION

University of Macau, Macau SAR, China

Bachelor of Social Sciences in Economics

Transferred from the Faculty of Business Administration after Year 1

Expected Jul 2027

GPA: 3.78 / 4.00

Selected Coursework

- *Economics*: Intermediate Microeconomics; Intermediate Macroeconomics; Advanced Microeconomics
- *Quantitative Methods*: Economic Mathematics; Statistics; Calculus; Causal Inference
- *Programming and Data Analysis*: Python; R for Machine Learning; Big Data Management
- *Political Science*: Comparative Politics; Research Methods; Applied Game Theory; Public Administration in China

Exchange Student, The Chinese University of Hong Kong, Shenzhen

Fall 2026

Core Coursework: Econometrics; Behavioral Economics; Deep Learning; Reinforcement Learning

Hanyang University, Summer School

Jun–Jul 2026

Core Coursework: Game Theory; East Asian Political Economy

London School of Economics and Political Science, Summer School

Jun 2024

Core Coursework: Accounting and Management

RESEARCH EXPERIENCE

Political Economy History and AI for Research Research Assistant

Nov 2025–Present

Prof. Weiwen Yin, University of Macau

- Translated political economy articles and reproduced formula-intensive materials in R Quarto, creating stable and reproducible documents with consistently rendered mathematical notation.
- Designed structured prompts in Google AI Studio to extract information from historical archives of overseas students, converting unstructured records into machine-readable datasets.
- Surveyed resources on AI-assisted social science research, including scholarly articles, GitHub repositories, and public databases, to support literature mapping and methodological experimentation.
- Participated in graduate-level training in causal inference with the principal investigator and applied methodological concepts to ongoing empirical research.

Economic History and AI-Assisted Data Engineering Research Assistant

Jun 2025–Present

Research assistance for **The Persistent Impact of Historical Conflicts in China (Working in Progress)**

Project led by **Prof. Pei Gao** (NUS), and **Prof. Yu-Hsiang Lei** (HKUST)

- Served as the primary undergraduate coordinator at the University of Macau and contributed to the construction of a standardized 33-variable village-level coding framework.
- Identified and coded variables from historical gazetteers and local chronicles, covering population, religious institutions, infrastructure, migration, education, and related institutional features.
- Designed and iteratively refined large language model prompts to extract structured information from raw TXT sources, advancing a scalable TXT–JSON–CSV data transformation pipeline.
- Modified Python scripts for splitting digitized PDF books and developed an automated PDF segmentation workflow to support batch processing, structured extraction, and downstream data validation.

Regional Collaborative Governance and Social Network Analysis Research Assistant

Summer 2026

Prof. Shuwen Zhang, University of Macau

- Identified and organized variables on collaborative urban governance across the Greater Bay Area, Beijing–Tianjin–Hebei region, and Yangtze River Delta, focusing on intercity cooperation, policy coordination, and institutional arrangements.
- Constructed preliminary city-level and dyadic data structures to capture intercity collaboration ties and regional governance networks.
- Conducted social network analysis in R to examine patterns of urban collaboration, including network structure, centrality, and cross-city connectivity.

- Collected, organized, and cleaned data for a research project on how U.S. revolving-door laws affect legislators.

WORKS IN PROGRESS AND INDEPENDENT RESEARCH

Labor Market Legislative Politics within Hong Kong’s Pro-Establishment Bloc after the 2021 Electoral Reform

2025–Present

This project examines how legislators within Hong Kong’s pro-establishment camp diverge across labor-market governance issues, including labor importation, minimum wage, outsourcing, platform workers, and employment regulation. Drawing on roll-call votes, legislative motions, member profiles, and official labor-shortage data, the paper argues that post-2021 legislative politics are better understood not simply as regime cohesion, but as structured intra-coalition bargaining shaped by sectoral labor shortages, employer cost pressures, and local-worker protection concerns.

ACADEMIC ACTIVITIES

Social Science Research Seminar — Prof. Tao Li, Hong Kong Metropolitan University

Present

Participate in a faculty-led seminar on empirical strategies and research design, featuring weekly discussions of seminal papers on causal reasoning, theoretical framing, and identification across political science, economics, and public policy.

Micro Theory Reading Group — Department of Economics, University of Macau

Present

Participate in a department-level reading group on advanced microeconomic theory, led by **Prof. Inácio Bó** and **Prof. Lawrence Choo**, engaging with classical and contemporary literature.

TEACHING EXPERIENCE

Instructor, R Programming and Data Science

Jan–Apr 2026

Choi Kai Yau College, University of Macau

- Designed the course outline and instructional materials for an R-based data science workshop covering programming workflows, data manipulation, visualization, and introductory data science concepts.
- Developed lecture slides using R Quarto and delivered instruction emphasizing reproducible data analysis practices.

PROFESSIONAL EXPERIENCE

Data Analysis Intern

Jun–Jul 2025

DMALL, Retail Cloud R&D Department, Beijing, China

- Cleaned and standardized product and inventory data using Python; analyzed sales and inventory trends to support product evaluation.

Marketing Development Intern

Jul–Aug 2024

JD Finance, Beijing, China

- Tracked and summarized client cash-flow indicators using Excel and BI tools.

AWARDS AND HONORS

Dean’s Honor List, University of Macau

Fall 2023–Fall 2025

Awarded for outstanding academic performance across multiple semesters.

SKILLS

Languages: Mandarin Chinese (Native); English (Fluent); Cantonese (Basic)

Programming and Tools: Python (API, Web Scraping); R (tidyverse, ggplot2, Quarto); $\text{\LaTeX}$; SQL; Power BI
